Water- and waste water treatment

municipality and industry

- Turnkey contracts
- Equipment supply and
installation
- Products
- Service

A photograph of a Malmberg COMPACT biogas upgrading plant. The plant consists of several tall, silver, cylindrical stainless steel towers connected by a network of pipes. The towers are situated on a blue-painted metal base. In the background, there is a green agricultural field with several wind turbines under a blue sky with white clouds. The text 'Malmberg COMPACT®' is overlaid on the left side of the image.

Malmberg COMPACT®

Plants for upgrading biogas

For the natural gas net

For vehicles in gas stations

70 plants installed in Germany, Sweden,
